

Data Sheet

QT600BK LSE

Double Sided Black Acrylic Foam Tape for Low Surface Energy

High performance foamed acrylic adhesive excellent for bonding low and medium surface energy materials e.g. Powder Coated Metal, Plastics etc. Suitable for long term bonding applications indoor and outdoor. Unaffected by UV.

High Temperature resistance

Performance Parameters

Type of Adhesive	Acrylic Solvent
Liner	Clear PET / Red PE Film
Thickness (mm)	0.8 / 1.1
180° Peel Strength (After 20 mins)	≥25
180° Peel Strength (After 72 hours)	≥35
Loop Tack N/inch	≥30
Elongation %	≥24
Low Temperature Resistance	-15°C
Temperature Resistance Long Term °C	80
Temperature Resistance Short Term °C	120
Length	33m
