work accurate and safe

Risk without Wetguard

Solution with Wetguard

Wetguard®

Building damage through wetness

Post-processing of deformed, imprecisely fitting and discoloured wooden elements can result in the following:

Delays of construction work

Higher cost

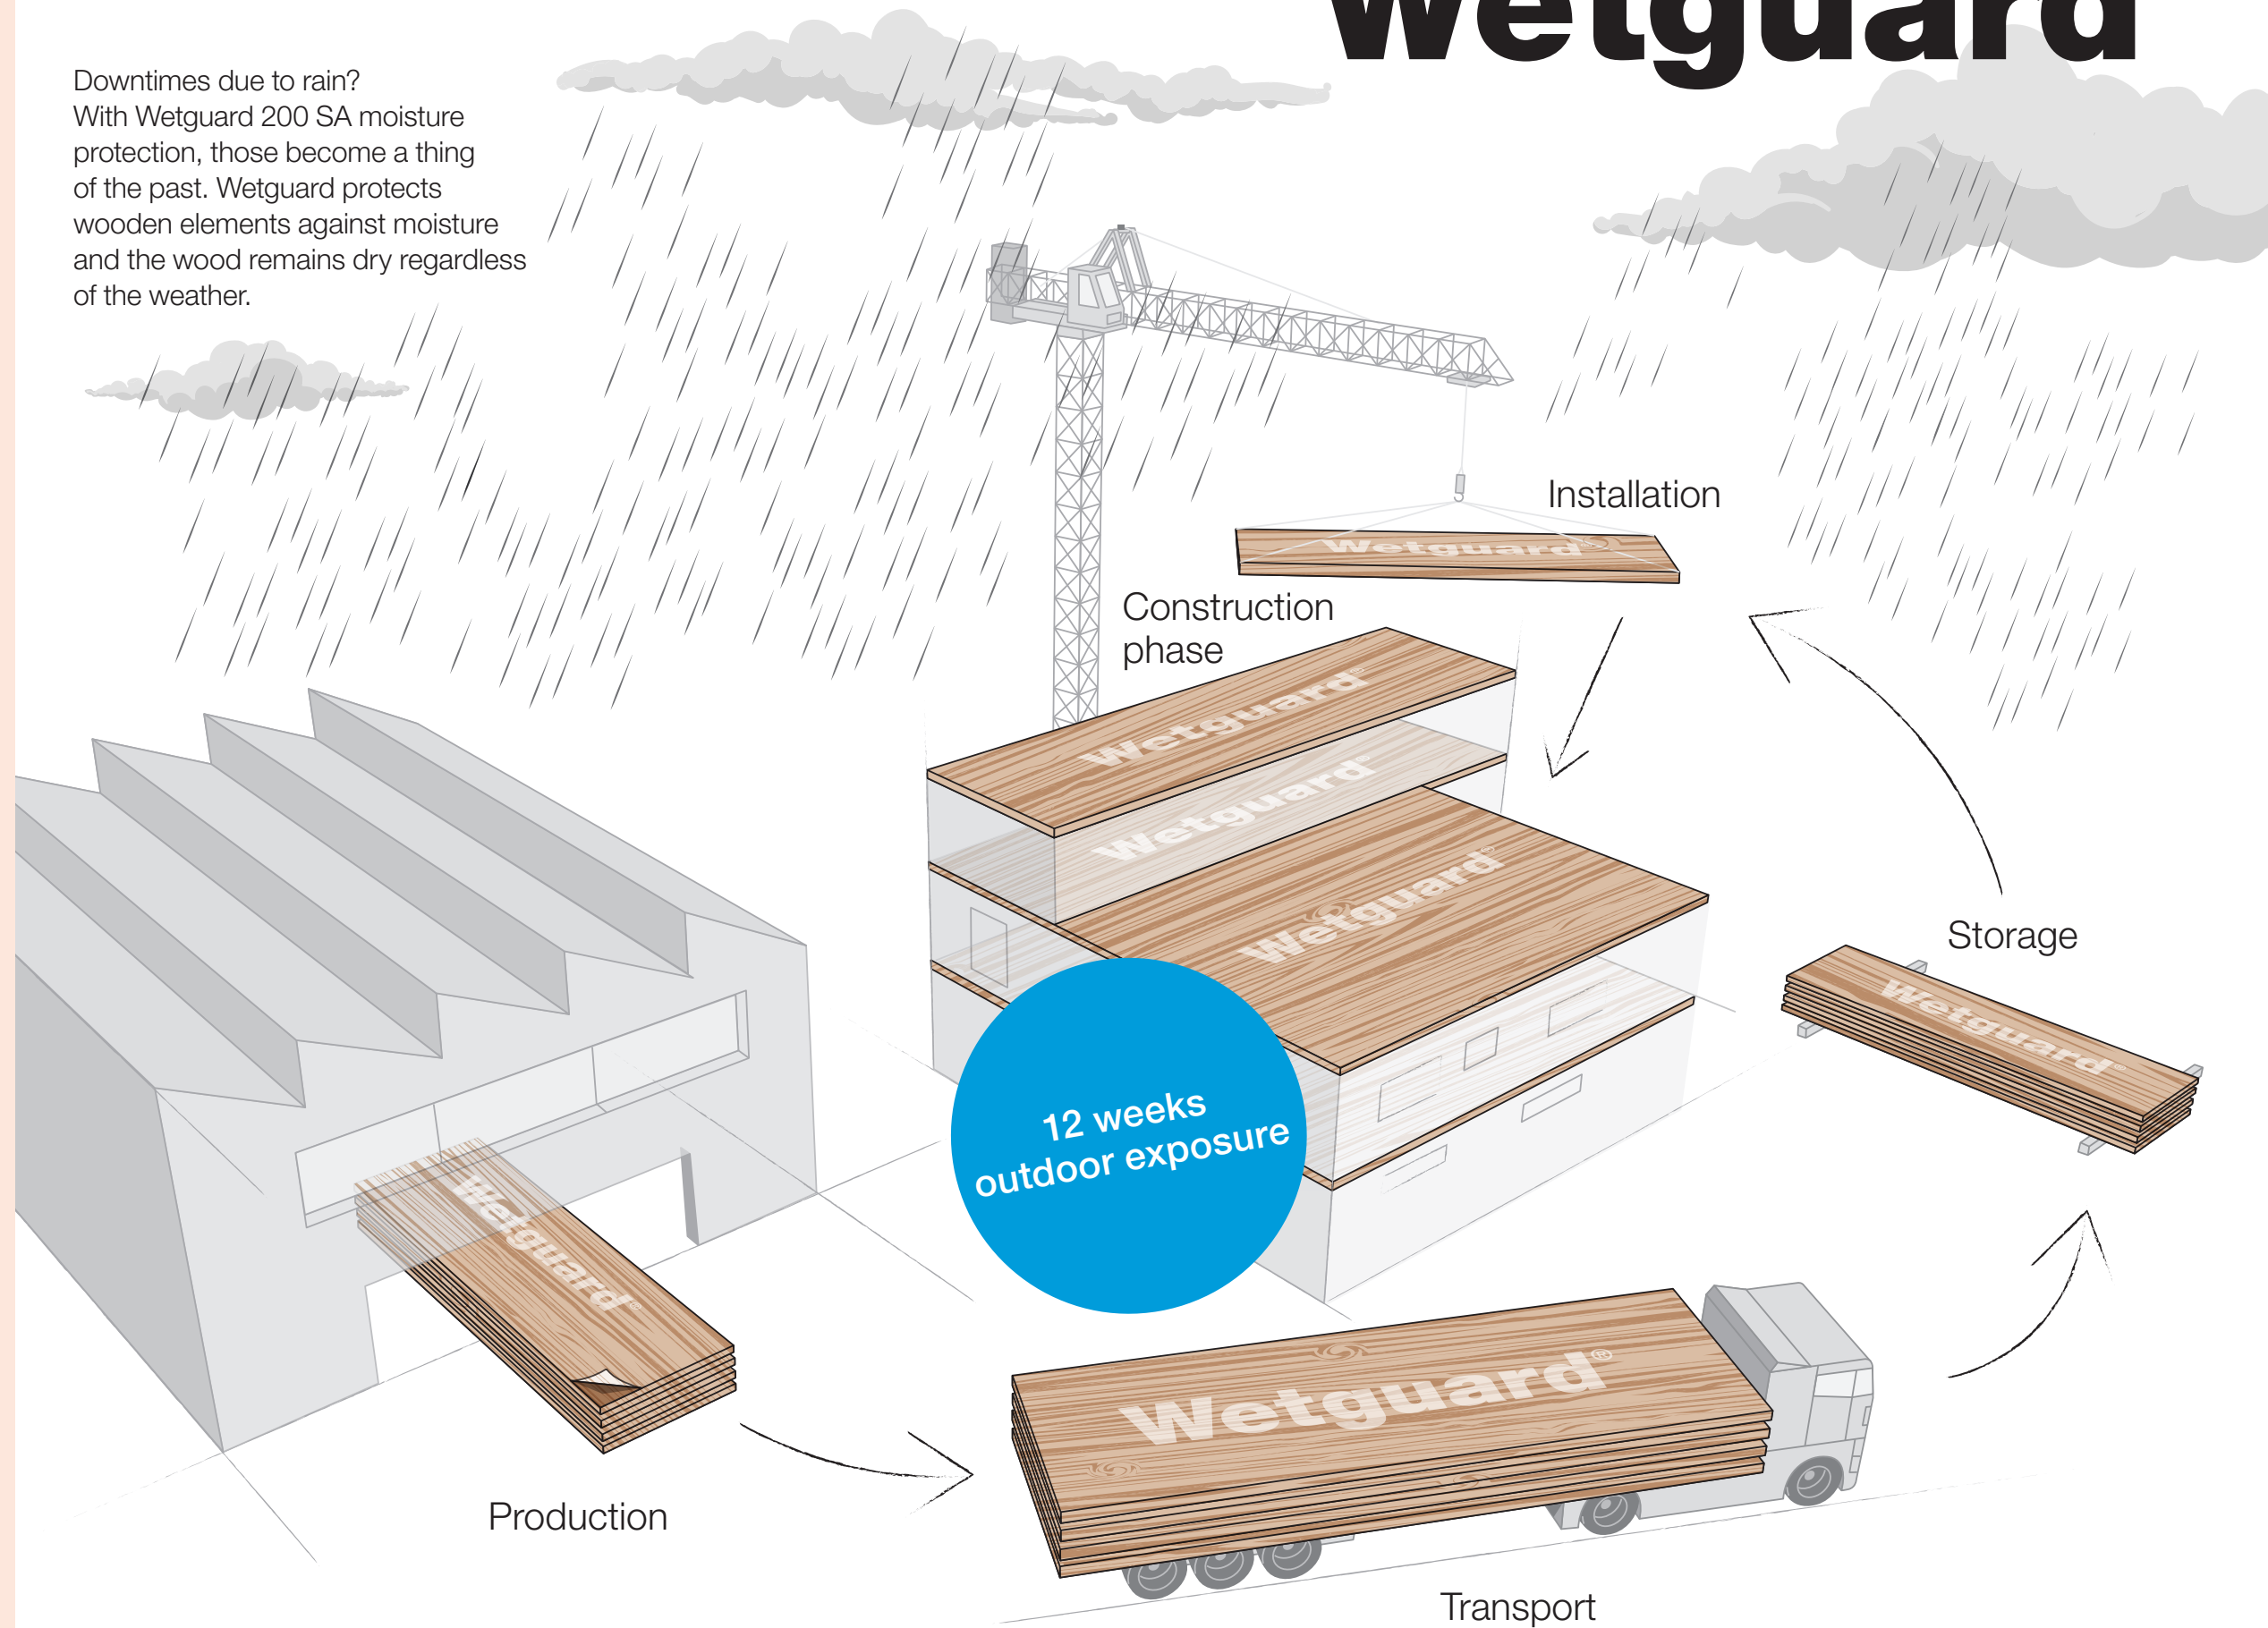

Additional working time

Safety risk

Downtimes due to rain? With Wetguard 200 SA moisture protection, those become a thing of the past. Wetguard protects wooden elements against moisture and the wood remains dry regardless of the weather.
